PROFESSIONAL SUMMARY

Full stack engineer with 4+ years shipping production web systems — React/Next.js/TypeScript on the front, Node.js and PHP on the back, Postgres underneath. Built a payment system that processed ₪300K+ in its first month and 30+ WordPress Gutenberg blocks for enterprise clients. On the side, built and run two small SaaS products with paying customers: a Gmail cleanup tool (passed Google's CASA Tier 2 security assessment, featured on the Chrome Web Store) and an embeddable chat SDK with a managed AI assistant. Self-directed, dependable, and comfortable owning a feature from spec to production.

Core: React, Next.js, TypeScript, Node.js, PHP/WordPress, PostgreSQL, Payment Integrations, Cloud Architecture

EXPERIENCE

Full Stack Developer — One Digital 2024–2026

- Built end-to-end Strapi payment system: integrated Meshulam SDK, processed ₪300K+ in transaction volume in its first month, with frontend SDK, lifecycle hooks, and webhook reconciliation flows.
- Implemented Dockerized Puppeteer on Azure Functions for automated PDF invoice generation.
- Built 30+ custom React-based Gutenberg blocks and an automated ACF block generator (Laravel), cutting dev time by 80%.
- Led Strapi-to-Azure workflow design across frontend, backend, and DevOps; optimized Azure PostgreSQL APIs and Bitbucket CI/CD; built WPML multilingual architecture with RTL/LTR support for enterprise clients (Dimri, Sonol, Rishumit).

Tech: React, Node.js, PHP, WordPress, Strapi, Laravel, Azure, Docker, CI/CD

Full Stack Developer — Hertz Furniture 2022–2024

- Migrated 100K+ records to Salesforce; built REST APIs and automated workflows.
- Integrated Microsoft Graph API for OneDrive, cutting storage costs by 40%.
- Implemented SignNow e-signatures, reducing contract turnaround time by 90%.
- Developed Yii/PHP backend systems and Webix/jQuery frontend tools.

Tech: PHP, Yii, Salesforce API, Microsoft Graph, REST, Webix

Full Stack Developer — Elphi (SaaS) 2022

- Migrated Firebase to PostgreSQL, improving performance and analytical stability; added GraphQL subscriptions for real-time UI updates.

Tech: Firebase, PostgreSQL, GraphQL, Node.js

SIDE PROJECTS

GhostChat (2025–present) ghostchat.dev

- Built and run solo. 15KB embeddable live-chat SDK: Cloudflare Workers API with Durable Objects for real-time messaging, Next.js dashboard on Vercel, PostgreSQL, Stripe billing, multitenant isolation, webhooks and event pipelines. Shipped a managed AI assistant (Claude Haiku) with grounded, page-context answers and a FAQ knowledge base across Free, Pro, and Team plans. Live with paying customers; WordPress.org plugin; grew organically through SEO.

Gmailytics (2026–present) gmailytics.com

- Built and run solo. SaaS web app for bulk inbox cleanup and unsubscribe. Built full OAuth 2.0 flow, Gmail API integration, and batch processing pipeline — ~6M emails cleaned, 400GB+ of mail cleared, 580+ users, with paying subscribers. Re-architected live storage from single-blob to per-record rows, removing a 20K-email cap and quadratic load behavior. Passed Google's CASA Tier 2 security assessment; Chrome Web Store Featured.

KaspaWoo (2025) kaspawoo.com

- Open-source WooCommerce payment gateway for Kaspa cryptocurrency. PHP backend, frontend SDK, webhook handling, and order reconciliation. Published on WordPress.org.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript/TypeScript, React, Next.js, Node.js, Express.js, PHP, Python, GraphQL, REST, Redux

Cloud & DevOps: Vercel, Cloudflare Workers, Durable Objects, Azure (Functions, Blob, PostgreSQL), GCP (Gmail API, OAuth), AWS (S3), Docker, CI/CD

Databases & CMS: PostgreSQL, Supabase, MongoDB, Firebase, Strapi, Laravel, WordPress

Other: SDK Development, API Integrations, Stripe, Puppeteer, Performance Optimization

EDUCATION & AWARDS

Full Stack Bootcamp — DevMountain (2021) · Most Advanced Project Award

B.Sc. Information Systems — University of Maryland (2019) · Kathryn Stewart Fellowship
